30 years of research for the Activator

dear friends

In many tests, experiments and samples, Swiss, German and American researchers have succeeded in developing an elixir of life, which can basically activate and reactivate the vital and creative energies and vibrations in organisms, such as humans, animals and plants – our ACTIVATOR.

Based on quantum physics, the knowledge of the life energy water and the necessary minerals, the **Activator** was developed, which carries the special structure of water molecules and the natural energetic vibrations of the health-promoting minerals.

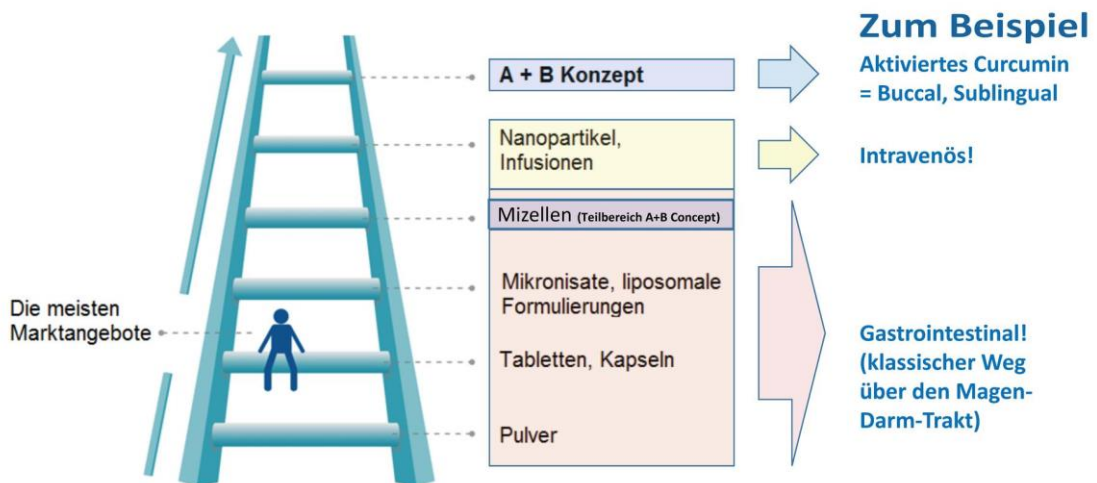

As a result, extraordinary results have been achieved. Based on the fact that practically all metabolic processes in the body take place in aqueous milieu, the Activator has brilliantly proved to be a transporter and a direct channel of plant active substances and vitamins through the oral salivary glands. Moreover, its power is highly appreciated in natural cosmetics and wound healing. It goes without saying that the worldwide unique Activator and the two-component system have been applied for a world patent. These combinations open unimagined new possibilities in natural medicine. The divine laws of nature are indisputable and are supported by this process.

Phytochemicals highly bioavailable with Crystal A+B concept.Component B:
"Phytochemicals such as Curcumin, Resveratrol, Alphalipon, Frankincense, Iron, Vitamin C, etc."

Phytochemicals from Crystalswiss are highly concentrated and prepared in liquid form. With little quantity of these nutrients, great efficiency is achieved. For example, the positive effects of curcumin have been proven in many thousands of studies. But with the previous dosage forms, such as powders and pills, the phytosubstance is unfortunately useless because it cannot overcome the eye of the needle to bioavailability and the active ingredient does not reach the cell. This is completely different with the Crystal A+B concept. New worlds are opening up in natural medicine. The effects of the plant active ingredients, proven in laboratory studies, can come true for everyone out there. Of course it would make a lot of sense to use these products already for prevention, not only when it hurts. Much suffering could be avoided. By the way, also for pets.

Transportwege in den Körper

Marktübersicht aller Phyto -Präparate (Stand April 2016)

Always remember that you are the creator of your own things. At the lecture, this is somewhat clarified. You can then see and feel. Here to the registration. We trust in the laws of nature. Everything that is against nature, becomes a painful boomerang for man.

The time is ripe to stand up for your own health and take personal responsibility. Do not let yourself be tempted further from the frying pan into the fire. I wish you good progress and the necessary foresight in dealing with your health. And please do not forget. Treat yourself to this informative and special lecture.

Sincerely yours!
